

Bradwell Group Client
Snackbrands Australia

Project Builder
Snackbrands Australia

Trade
Electrical

Value
\$10,000 - \$50,000

Completion Date
April 2022

Bradwell Group were asked to create a solution to deter birds hanging around the waste bins at Snackbrands.

The first site at Smithfield distribution warehouse was such a great success we were asked to install another system at their Blacktown production plant.

Snackbrands have built a new Distribution Centre at Orchard Hills, we were once again asked to install a couple of systems out there.

Using a Broadband Pro – Sonic and Ultra Sonic Bird Deterrent System consisting of four speakers and a combination of bird noises emitting ultra sonic sounds waves throughout the canopy, it intimidates the birds and keeps them away.

The scare balloons were randomly located around the truck parking canopy and this has now solved the problem for Snackbrands.

Bradwell Group are also contracted to perform regular electrical and air conditioning maintenance at all Snackbrands sites.
